Minister of Regional Industrial Expansion

CANADA

Ministre de l'Expansion industrielle régionale

The Honourable L'honorable

Sinclair Stevens, P.C., Q.C., M.P.

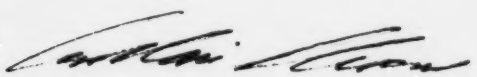
Her Excellency, The Right Honourable Jeanne Sauvé, P.C., C.C., C.M.M., C.D.
Governor General of Canada
Government House
1 Sussex Drive
Ottawa, Ontario
K1A 0A1

Your Excellency:

I have the honour to submit to Your Excellency the Annual Report on the Industrial and Regional Development Program (IRDP) for the period April 1, 1984 to March 31, 1985.

Your Excellency, you will find under appropriate headings in this Report a summary highlighting the major accomplishments of this Program.

Respectfully submitted,



Hon. Sinclair Stevens, P.C., M.P.

Ottawa, Canada K1A 0H5

EXPLANATION OF TERMS 54

IRDP: Annual Report To Parliament

A. INTRODUCTION

The Minister of Regional Industrial Expansion is required, under Section 15 of the Industrial and Regional Development Act, to report to Parliament by the first day of June following each fiscal year on the administration of the Act. This second annual report includes an explanation of the IRDP, and an analysis of the program's operations and trends for fiscal year 1984/85.

Explanation of the terms used in administering the Act appears at the end of the report.

The IRDP was established in 1983 as part of the amalgamation of the Departments of Industry, Trade and Commerce (ITC) and Regional Economic Expansion (REE) to form the Department of Regional Industrial Expansion (DRIE). A number of programs operated by the two departments were subsumed by the new program.

The objective of the IRDP, which is one of the major programs of the Department of Regional Industrial Expansion (DRIE), is to promote regional industrial development through the support of private sector initiatives with particular emphasis on projects, industries and technologies with the greatest potential for economic return, sustained growth and international competitiveness. The program makes financial assistance available to business and non-profit organizations through contributions, or repayable contributions. A wide range of projects may be eligible for support under the IRDP including feasibility studies, product and process innovation, new plant establishment, modernization or expansion of existing plant facilities and marketing.

Many worthwhile projects fail because assistance is not available in an appropriate form at a specific stage in their development. The IRDP addresses this need by providing a range of financial support over the major phases or elements of a typical corporate development cycle. The elements of the program are:

- Innovation
- Establishment
- Modernization/Expansion
- Marketing

With few exceptions, applications are received and analyzed in the DRIE regional offices, and decision-making for small cases involving contributions of up to $100 000 in Crown support has been decentralized to these offices. The IRDP responds particularly to the needs of small and medium-sized businesses and complements other federal programs.

Two types of applicants are eligible for support under the IRDP:

- Commercial operations, consisting of manufacturing or processing operations, which can apply under Innovation, Establishment and Modernization/Expansion.

- Eligible persons, who are essentially non-profit organizations carrying on activities in support of commercial operations, that can apply under Innovation and Marketing.

Although the program is national in scope, financial assistance is available in all regions of Canada based on tier groups into which census divisions are classified. There are four tier groups:

- Tier I consists of the most developed census divisions of the country where approximately 50 per cent of the population live.
- Tier II comprises census divisions that are next in line on the development scale and accounts for approximately 30 per cent of the population.
- Tier III covers the relatively less developed areas and accounts for approximately 15 per cent of the population.
- Tier IV includes the least developed areas in which no more than 5 per cent of the population reside.

Financial assistance under the IRDP is scaled in proportion to the tier group level in which the eligible project is located, i.e. the higher the tier level, the greater the maximum possible assistance. Tier group designations are made according to a 'development index' which is a measure of economic disparity in the country based on income, unemployment and provincial fiscal capacity indicators in 260 of Canada's census divisions as provided by Statistics Canada.

Tier group designations are reviewed annually on July 1 for possible adjustment depending on changing economic conditions. As a result of the rearranging on July 1, 1984, there were 14 census districts that moved to the next higher tier while 16 moved to the next lower tier.

To address possible short-term economic downturns in a Tier I census district, the program provides for the equivalent of Tier II assistance for the Establishment and Modernization/Expansion elements when the average ratio of unemployment insurance beneficiaries to working-age population in the census district exceeds, by one percentage point, the national average for any consecutive six months. Applications are accepted for one year following designation of an area as Special Tier I.

Assistance takes the form of outright contributions or contributions that are specifically or conditionally repayable. The maximum levels of assistance vary from element to element and, in most elements, increase with the tier levels. Full details are contained in the regulations and program brochure available from any office of the department. For projects under $100 000 of Crown support, the maximum level of assistance will be offered. For others, the amount of assistance offered is the estimated minimum necessary to meet the requirements of the project. Particular attention is paid to the capacity utilization in the applicant's industrial sector and impact of the proposed project on other businesses so that the net economic benefits to Canada are maximized with program expenditures. For projects under all elements, the maximum level of assistance from all government sources, including investment tax credits, cannot exceed 90 per cent of the project costs.

It should be emphasized that, although IRDP represents the major funded program of DRIE, it is not the only program. Other funded programs include the Defence Industry Productivity Program (DIPP), the Small Businesses Loans Act (SBLA), the Canadian Industrial Renewal Board (CIRB), Special ARDA (Agricultural and Rural Development Act), the Western Transportation Industrial Development Program (WTIDP) and the Native Economic Development Fund (NEDF). Also, funded programs are only one aspect of DRIE. There are many other non-funded activities carried out by the department to encourage industrial development and trade promotion in all regions of Canada.

It should be noted that applications for financial assistance and supporting documentation received under the IRDP and other departmental programs contain information that must be regarded as commercially confidential. For this reason and as a matter of policy, the department does not make public certain types of data. It is for similar reasons of commercial confidentiality that the department does not reveal that a particular application has been received unless and until it results in an accepted offer of financial assistance.

B. CHANGES TO IRDP

In November 1984 major changes were announced to streamline the program, to focus assistance on innovation projects and to ensure that support is concentrated in areas where it is most needed. The most significant changes to this program are outlined below:

1. *Termination of* Industrial Development Climate and Restructuring Elements

Under the Industrial Development Climate element, assistance was provided for studies and courses relating to industrial development, for the establishment of non-profit centres or institutions that supported work related to industrial development and for infrastructure directly related to regional industrial development if cost-shared with a province or municipality. This element was terminated because the major aspects of eligible assistance could be more effectively addressed through federal-provincial subsidiary agreements.

The Restructuring element assistance could be provided for the cost of hiring consultants, loan guarantees, repayable contributions and participation loans. This element was rarely used under the IRDP and, consequently, it was terminated.

2. Elimination of Modernization/Expansion Element Eligibility in Tier I

Tiers II, III and IV represent the areas of greater economic need in Canada whereas Tier I comprises the most developed areas of the country, as determined by the development index. On this basis, it was decided that the assistance available under the Modernization/ Expansion element would be restricted to these areas of greater need.

3. Ineligibility of Tourism Projects

Experience shows that tourism projects are very diverse and that there is a strong provincial interest in them. For these reasons, tourism projects can be considered more effectively through federal-provincial subsidiary agreements.

4. Maximum Levels of Assistance

The maximum levels of assistance were reduced to two-thirds of the former levels for projects in the Innovation element, and to one-half of the former levels for the remaining elements. The new levels are approximately the same as the average levels of assistance that had been actually offered since program inception. The previous maximum levels were, in fact, rarely used and appear to have been higher than was necessary to facilitate most investment projects. With this revision, applicants will be given automatic eligibility for the new maximum support levels for projects requiring IRDP assistance of less than $100 000 provided that the basic program criteria of viability, incrementality and economic benefit to Canada are met.

5. Ineligibility of Crown Corporations

Since Crown corporations are instruments of government, it is more appropriate that they are funded through the legislatures. Accordingly, all wholly-owned or effectively controlled federal and provincial Crown corporations and their wholly-owned or effectively controlled subsidiaries are ineligible for support under the IDRP.

C. RESULTS

During the 1984/85 fiscal year, 3 984 applications were received bringing the number from inception to March 31, 1985, to a total of 7 614. This represents a monthly average of 332 applications compared with 403 per month in fiscal year 1983/84.

Statistics on IRDP activities for each tier, from July 1, 1983, to March 31, 1985, are presented in **Table 1**. The data is based on all applications received since inception and reflects their disposition as at March 31, 1985. The cumulative total of applications includes 26 cases received under the Regional Development Incentives Act (RDIA) and transferred to the IRDP in accordance with section 13 of the IRD Act.

Tables 3, 4, 5, 6 and 7 present more detailed information on offers accepted for the current year and on a cumulative basis. **Tables 8, 9 and 10** present additional data for the current year only. These tables are discussed below.

1. Disposal of Applications Received

Total applications under analysis at March 31/85	1 609
plus total applications received during FY 1984/85	3 984
equals total application requiring assessment during FY 1984/85	5 593
less total assessments completed at March 31/85	4 780
equals total applications under analysis at March 31/85	813

Included in the 4 780 assessments completed are 1 619 offers made and 28 projects authorized on which offers will be made early in 1985/86.

Table 2 shows the number of applications received in 1984/85 in each tier. It can be seen that Tier II again has the highest proportion of applications received, 1 364 applications or 34 per cent of the total. However, it should be noted that Tier IV has the highest number of applications per capita among all tiers.

2. Disposal of Offers

Total offers made at March 31/84	549
plus total offers made during FY 1984/85	1 619
equals total offers made at March 31/85	2 168
less offers accepted at March 31/84	381
equals total offers that can be accepted during FY 1984/85	1 787
less offers declined/withdrawn at March 31/85	88
less offers lapsed at March 31/85	57
less offers not yet accepted at March 31/85	178
equals total offers accepted during FY 1984/85	1 464

Table 3 shows offers accepted during the current fiscal year and the cumulative acceptances since inception of the program. The 1 464 offers accepted in 1984/85 have an IRDP contribution of $418 million. This brings up the total number of accepted offers to 1 845 and the total amount of cumulative contribution to $501 million since inception of the program. It should be noted that the 1 845 accepted offers represent 85 per cent of the 2 168 offers made since the inception of the IRDP.

Tables 3, 4, 6 and 7 provide a breakdown of these accepted offers by tier grouping, by planning element, by size of assistance and by major industry groups respectively. **Table 5** shows the accepted offers over $5 million by planning element and tier. A detailed listing of each of the 1 464 offers accepted in 1984/85 appears in **Table 10**.

From **Table 3**, it can be seen that the largest proportion of offers accepted were in Tier II, 458 or 31 per cent, followed closely by those accepted in Tier I, 419 or 29 per cent, and in Tier III, 398 or 27 per cent. However, the corresponding authorized assistance shows that Tier I had the largest proportion of total assistance, $175 million or 42 per cent as compared to $111 million or 27 per cent in Tier II and $64 million or 17 per cent in Tier III. The dollar value of offers accepted in Tier IV accounted for only 14 per cent of total IRDP assistance.

As can be seen in **Table 4**, the Modernization/Expansion program element, with 826 accepted offers represented approximately 56 per cent of total IRDP assistance for 1984/85. The Innovation element was a distant second with 266 offers accounting for only 18 per cent of the total. Some 106 (or 7 per cent of total offers) were accepted in the Industrial Development Climate program element while only 8 offers (0.5 per cent of the total) were accepted in the Restructuring element reflecting, in part, the changes in eligibility for assistance in these elements as a result of the November 9, 1984, regulatory changes.

Table 6 provides a breakdown of offers by different sizes of assistance. It can be seen that 70 per cent of all offers were for less than $100 000 in Crown contribution. However, these amount to only 11 per cent of the total dollar value of authorized assistance under IRDP in 1984/85. Even though there were only 60 offers with assistance greater than $1 million, the proportion in terms of dollar value of these large offers was more than 62 per cent of total assistance. **Table 5** shows that, for the 14 accepted offers over $5 million each, 36 per cent of total assistance was provided. Of these 14, 5 offers in Tier I accounted for 20 per cent of the total.

Table 7 gives both the number of accepted offers and the authorized assistance for each major industry group eligible under the program. This table reveals that the Metal Fabricating and the Food Industry sectors, each with 11 per cent of accepted offers, and the Machinery sector which had 10 per cent of accepted offers, accounted for only 14 per cent of total assistance. On the other hand, the Transportation Equipment sector had the highest proportion of financial assistance (24 per cent) with only 5 per cent of the number of accepted offers, followed by the Electrical/Electronic Products sector with 20 per cent of total assistance and 10 per cent of the offers. In the Tourism sector, 124 offers were accepted representing 4 per cent of the total dollar value of IRDP assistance given in 1984/85.

Even though the "other" sector accounts for 7 per cent of the authorized assistance, its principal sub-group is the Education sector which has accepted 66 offers representing 2 per cent of the dollar value of all IRDP assistance. The remaining 5 per cent is distributed among various other sectors.

3. Benefits

One of the general IRDP program criteria stipulates that the project and exploitation of the results must represent significant economic benefits to Canada. Two of the main indicators of economic benefits in IRDP are the number of jobs created and/or maintained as a result of the authorized assistance and the leverage of private investment which measures the investment of the private sector in the projects being supported for each dollar contributed by the federal government.

Table 8 provides a breakdown, by planning element and by tier, of the leverage of private investment. This ratio is obtained by dividing the eligible costs of projects by the authorized assistance. Examination of this table reveals that the highest ratio, 7:1, is in the Expansion/Modernization element and in Tier I, followed by the Establishment element and Tier IV at 6:1. The lowest leverage is for the Marketing element at 2:1.

This means that for each dollar contributed by the federal government, the private sector has invested approximately $7 in Tier I and in Expansion/Modernization related projects as opposed to only $2 in Marketing related projects. The average leverage of private investment taken across all tiers and planning elements is 6:1. This overall ratio was 4.5:1 in 1983/84, thus indicating that in 1984/85 greater leverage of private investment was achieved.

The jobs to be created and maintained for each tier and for the Innovation, Establishment and Modernization/Expansion program elements are provided in **Table 9**. It can be seen that for each job created and maintained as a result of the IRDP in 1984/85, the cost to the Crown ranged from a high of $24 672 to a low of $6 688. The average cost per job across the three program elements was estimated at $7 855. The highest cost per job is in Tier I Special at $24 672 while the lowest was $6 688 in the Modernization/Expansion element.

No data or jobs are provided on the Climate, Marketing and Restructuring elements since, for these, the only viable indicator of increased economic benefit remains the leverage of private investment as shown in **Table 8**.

EXPLANATION OF TERMS

This section identifies terms used in the report and provides a brief explanatory comment for each. These explanations are designed to facilitate understanding; they do not necessarily provide complete legal or administrative definitions nor do they depict all benefits, conditions, restraints or requirements that exist under the program. For specific purposes, reference should be made to the Industrial and Regional Development Act, the Regulations made under that Act, and other sources of official information.

1. Contribution: A contribution that is non-repayable, partially repayable, specifically repayable or one that is conditionally repayable under terms and conditions specified in the offer and accepted by the applicant.

2. Participation Loan: A loan for the establishment of a new facility or for the restructuring of a commercial operation which, by its terms, allows the Minister to participate in the success by means of a stock option, a royalty on sales or production or otherwise; the rate of interest for a participation loan is equivalent to the lowest rate of interest charged by the Federal Business Development Bank on its term loans.

3. Grant: Assistance given to an applicant for a study, scholarship or course development relating to industrial development.

4. Application: A written submission by an applicant requesting assistance under the Industrial and Regional Development Act.

   (a) Received: An application delivered to the department. The date of receipt is used for reporting and for establishing whether any prior commitment has occurred in respect of a cost of a proposed project or activity.

   (b) Withdrawn: An application revoked by the applicant before or during evaluation.

   (c) Rejected: An application for a project considered ineligible under the legislation, which would proceed without assistance, or which would make no significant economic or social contribution to Canada.

   An application normally relates to a single project at a single site.

5. Offer Made: When an application has been evaluated and a grant or contribution has been authorized, the estimated amount of the grant or contribution and the related conditions are made known to the applicant in a formal letter of offer.

   (a) Lapsed: If an applicant does not formally accept an offer within 90 days, the offer lapses.

   (b) Withdrawn: If the department becomes aware of certain kinds of information prior to acceptance, it may revoke its offer.

   (c) Declined: A formal decline of an offer by the applicant.

6. (a) Offer Accepted: Offer acceptance occurs when the applicant returns a signed copy of the offer within 90 days from its date.

   (b) Offer withdrawn (after acceptance): If the department determines that legal requirements have not been met, it takes action to withdraw the offer, or if an applicant revokes his acceptance of an offer.

7. Final Payment Made: A final payment on account of contribution is made when the department is satisfied that all the conditions specified in the accepted offer have been met. The final payment for an establishment, expansion or modernization project cannot be made until 24 months after the certified date of commercial production. For all other projects, the final payment is made on completion of the project.

8. Project Location: The location of the project based on information provided by the applicant.

9. SIC Code: The Standard Industrial Classification System 1980 established by Statistics Canada for standardizing definitions and techniques in the gathering and compilation of statistics related to industries in Canada.

10. Program Elements:

   (a) Climate: Projects under the Industrial Development Climate element of IRDP for the establishment of a non-profit centre or institute relating to industrial development, for an economic development study, for specialized services, for infrastructure development or for course development or scholarships.

(b) Innovation: Projects for the development of a new or improved product or production process, for the design of new, mass-producible durable products, for the improvement or expansion of technological capability, or for research and development in the area of pollution abatement technology.

(c) New facility: Establishment of a new facility to manufacture goods, or provide services (tourism).

(d) Modernization: A change or addition made to an existing facility primarily designed to reduce production costs, improve product quality, and which can include replacements of existing fixed assets, with or without the use of micro-electronic devices.

(e) Expansion: An addition to an existing facility to increase the output of the commodity or service on the same site, or a relocation of a facility.

(f) Marketing: Projects for collecting and disseminating information, arranging a special event or conference to develop and increase the market of tourism operations, or to increase the marketing of the products or services of these operations; also for literature, advertising, trade shows, seminars, market research and analysis, and promotion of Canadian standards and product specifications to increase the marketing of the products or services of commercial operations.

(g) Restructuring: A change with respect to the products, methods of production, services, markets or management procedures of a commercial operation that is in need of renewal.

11. Estimated Eligible Cost: The costs of a development climate, innovation, establishment, expansion, modernization, marketing or restructuring project, as estimated by the department on the basis of information supplied by an applicant, covering only costs that are eligible for a grant, contribution or participation loan.

12. Authorized Amount of Assistance: The departmental grant, contribution or participation loan to be paid, based on the terms of the accepted contract.

Ministre de l'Expansion industrielle régionale

The Honourable L'honorable

Sinclair Stevens, P.C., Q.C., M.P.

Son excellence, la très honorable Jeanne Sauvé, c.p., C.C., C.M.M., C.D.
Gouverneur général du Canada
Résidence du Gouverneur général
1, promenade Sussex
Ottawa (Ontario)
K1A 0A1

Votre Excellence,

J'ai l'honneur de présenter à Votre Excellence le rapport annuel du programme de développement industriel et régional (PDIR) pour la période du 1er avril 1984 au 31 mars 1985.

Votre Excellence trouvera dans ce rapport l'analyse succincte des réalisations au titre de ce programme.

Je vous prie d'agréer, Votre Excellence, l'expression de ma plus haute et très respectueuse considération.

L'honorable Sinclair Stevens, c.p., député

Ottawa, Canada K1A 0H5

DÉFINITION DES TERMES 54

PDIR : rapport annuel au Parlement

A. INTRODUCTION

Le ministre de l'Expansion industrielle régionale est tenu, aux termes de l'article 15 de la Loi sur le développement industriel et régional, de déposer devant le Parlement le 1er juin qui suit la fin d'une année financière un rapport sur l'application de cette loi. Le deuxième rapport annuel explique le Programme de développement industriel et régional (PDIR) et analyse les activités et les tendances du programme au cours de l'année financière 1984-1985.

Les expressions utilisées pour appliquer la Loi sont expliquées à la fin du rapport.

Le PDIR a été créé en 1983 par suite du fusionnement du ministère de l'Industrie et du Commerce (MIC) et du ministère de l'Expansion économique régionale (MEER), qui forment maintenant le ministère de l'Expansion industrielle régionale (MEIR). Le PDIR englobe un certain nombre de programmes auparavant réalisés par les deux ministères qui ont fusionné.

Le PDIR, qui compte parmi les principaux programmes du ministère de l'Expansion industrielle régionale (MEIR), vise à favoriser l'expansion industrielle régionale en appuyant les initiatives du secteur privé offrant les plus grandes chances de rentabilité, de croissance soutenue et de compétitivité sur la scène internationale. Le programme vise à accorder de l'aide financière aux entreprises et aux organismes sans but lucratif sous forme de contributions ou de contributions remboursables. Des projets très variés sont admissibles à de l'aide dans le cadre du PDIR, notamment des études de faisabilité, la mise au point de nouveaux produits et procédés, l'établissement de nouvelles usines, la modernisation ou l'agrandissement des installations existantes et la commercialisation.

De nombreux projets échouent parce que l'aide appropriée n'est pas disponible à une étape précise de leur développement. En vue de résoudre ce problème, le PDIR prévoit une gamme de stimulants financiers qui sont offerts aux étapes importantes du cycle typique de développement d'une entreprise. Les éléments du programme sont :

- l'innovation;
- l'établissement;
- la modernisation et l'agrandissement;
- la commercialisation.

A quelques exceptions près, les demandes sont reçues et analysées dans les bureaux régionaux du MEIR, et lorsqu'il s'agit de demandes d'aide ne dépassant pas 100 000 $, les décisions sont prises dans ces bureaux. Le PDIR, qui convient particulièrement bien aux petites et moyennes entreprises, vient compléter d'autres programmes du gouvernement fédéral.

Voici les deux genres de requérants qui peuvent recevoir de l'aide au titre du PDIR :

- Les entreprises commerciales dans le domaine de la fabrication et de la transformation peuvent présenter une demande en vertu des éléments d'innovation, d'établissement et de modernisation et d'agrandissement.

- Les particuliers admissibles, essentiellement des organismes sans but lucratif dont les activités viennent appuyer les opérations commerciales, peuvent présenter une demande au titre des éléments d'innovation et de commercialisation.

Bien que le programme ait une envergure nationale, l'aide financière est offerte dans toutes les régions du pays, compte tenu des paliers utilisés pour le classement des districts de recensement. Il existe quatre paliers (ou groupes) :

- Le palier I englobe les districts de recensement du pays les mieux nantis où vit environ 50 % de la population.
- Le palier II comprend les districts de recensement qui suivent, sur le plan du développement, et où vit près de 30 % de la population.
- Le palier III regroupe les régions moins bien nanties où habite environ 15 % de la population.
- Le palier IV comprend les régions les moins bien nanties du pays dans lesquelles ne réside que 5 % de la population.

L'aide financière fournie en vertu du PDIR est accordée en fonction du palier dans lequel se classe le projet admissible; ainsi, plus le niveau du palier est élevé, plus l'aide éventuelle est importante. La classification par palier se fait à l'aide d'un " indice de développement " qui est une mesure des inégalités économiques au pays établies d'après les données relatives au revenu et au taux de chômage dans les 260 districts de recensement du Canada et suivant la capacité financière de la province où ils se trouvent; à noter que ces données sont fournies par Statistique Canada.

La classification par palier est revue chaque année le 1er juillet et est rajustée en fonction de la conjoncture économique. Par suite des rajustements effectués le 1er juillet 1984, le niveau de classification de 14 districts de recensement a été haussé d'un échelon tandis qu'il a été abaissé d'un échelon dans 16 districts.

Compte tenu des risques de revers économiques à court terme dans un district classé dans le premier palier, le programme prévoit l'octroi d'aide équivalente à celle fournie dans les districts du palier II pour les éléments d'établissement et de modernisation et d'agrandissement lorsque le rapport entre les prestataires de l'assurance-chômage et la population active dépasse de 1 % la moyenne nationale pendant six mois consécutifs. Les demandes sont acceptées pendant une année après qu'un district a été classé dans le palier I spécial.

Par ailleurs, l'aide est accordée sous forme de contributions inconditionnelles ou de contributions remboursables de façon forfaitaire ou conditionnelle. L'aide maximale disponible varie d'un élément à l'autre et, dans la plupart des cas, elle augmente en fonction du palier. Le règlement et la brochure sur le programme, disponibles dans tous les bureaux du Ministère, contiennent toutes les précisions utiles à ce sujet. L'aide maximale est fournie aux projets pour lesquels l'aide demandée est inférieure à 100 000 $. Quant aux autres, l'aide offerte correspond au montant estimatif minimal nécessaire pour satisfaire aux exigences du projet. Une attention toute spéciale est accordée à l'utilisation de la capacité du secteur industriel du requérant et aux incidences du projet sur d'autres entreprises, afin que les dépenses effectuées au titre du programme génèrent le plus de retombées économiques nettes possibles pour le Canada. Dans le cas des projets pour lesquels de l'aide est demandée aux termes de tous les éléments, l'aide maximale provenant de toutes les sources gouvernementales, y compris les crédits d'impôt à l'investissement, ne peut dépasser 90 % des coûts du projet.

Il convient de souligner que même si le PDIR est le principal programme du MEIR, il n'est pas le seul. Parmi les autres programmes de financement, citons le Programme de productivité de l'industrie du matériel de défense (PPIMD), le programme d'application de la Loi sur les prêts aux petites entreprises (LPPE), l'Office canadien pour un renouveau industriel (OCRI), l'ARDA spéciale (Loi sur l'aménagement rural et le développement agricole), le Programme de développement industriel relié au transport dans l'Ouest (PDITO) et le Fonds de développement économique des autochtones (FDEA). Il faut également préciser que ces programmes ne représentent qu'un aspect du MEIR. Le Ministère réalise aussi de nombreuses autres activités qui visent à favoriser le développement industriel et à promouvoir le secteur commercial dans toutes les régions du pays.

Il convient également de souligner que les demandes d'aide financière et les documents à l'appui présentés dans le cadre du PDIR et d'autres programmes ministériels contiennent une grande quantité de renseignements qui sont considérés comme confidentiels sur le plan commercial. Pour cette raison, entre autres, le Ministère a comme politique de ne pas rendre publics certains genres de données. De même, pour respecter le caractère confidentiel des demandes, le Ministère s'abstient d'annoncer qu'une demande a été reçue tant qu'elle n'a pas donné lieu à une offre acceptée d'aide financière.

B. CHANGEMENTS APPORTÉS AU PDIR

En novembre 1984, on a annoncé que des changements importants seraient apportés au PDIR en vue de simplifier le programme, de concentrer l'aide sur les projets innovateurs et de faire en sorte que l'aide soit accordée principalement dans les secteurs qui en ont le plus besoin. Voici les principaux changements apportés au programme :

1. L'abolition des éléments du contexte du développement industriel et de restructuration

Aux termes de l'élément du contexte du développement industriel, de l'aide était accordée pour les études et les cours et pour l'établissement de centres ou d'institutions sans but lucratif dans le domaine du développement industriel de même que pour les infrastructures ayant des liens directs avec le développement industriel dans les cas où l'administration provinciale ou municipale assumait une partie des coûts. Cet élément a été aboli parce qu'il était plus facile de fournir de l'aide dans le cadre d'accords complémentaires fédéraux-provinciaux.

Pour ce qui est de l'élément de restructuration, de l'aide financière pouvait être accordée pour acquitter les frais d'étude de conseillers; cette aide était également disponible sous forme de garanties de prêt, de contributions remboursables et de prêts participatifs. Cet élément était rarement utilisé dans le cadre du PDIR, d'où son abolition.

2. L'abolition de l'élément de modernisation et d'agrandissement - palier I

Les paliers II, III et IV englobent les secteurs les moins bien nantis sur le plan économique au Canada tandis que le premier palier regroupe les régions les plus riches du pays, d'après l'indice de développement. Il a donc été convenu que l'aide versée au titre de l'élément de modernisation et d'agrandissement serait accordée uniquement aux secteurs qui en ont le plus besoin.

3. L'inadmissibilité des projets dans le secteur touristique

L'expérience montre que les projets dans le secteur touristique sont très diversifiés et que les administrations provinciales s'y intéressent beaucoup. Il a donc été établi que l'aide accordée dans le domaine du tourisme serait plus efficace si elle était versée dans le cadre d'accords complémentaires fédéraux-provinciaux.

4. Les niveaux d'aide maximaux

Pour les projets relevant de l'élément d'innovation, le niveau d'aide maximal n'est plus que les deux tiers de ce qu'il était, tandis que pour les autres éléments, il a été diminué de moitié. Ces niveaux sont à peu près équivalents à l'aide offerte en moyenne depuis la mise en oeuvre du programme. En fait, l'aide maximale prévue auparavant était rarement accordée et semblait plus grande que nécessaire pour la plupart des projets d'investissement. Maintenant, les requérants seront automatiquement admissibles à l'aide maximale dans le cas des projets pour lesquels l'aide demandée dans le cadre du PDIR est inférieure à 100 000 $, pourvu que les critères de base du programme, c'est-à-dire la viabilité, la rentabilité et les avantages économiques pour le Canada, soient respectés.

5. L'inadmissibilité des sociétés de la Couronne

Étant donné que les sociétés de la Couronne sont, en fait, des organismes gouvernementaux, il est préférable qu'elles soient financées par les organes législatifs. Par conséquent, toutes les sociétés de la Couronne et toutes leurs filiales appartenant en tout au gouvernement fédéral ou à une administration provinciale ou régie en fait par eux ne peuvent recevoir de l'aide en vertu du PDIR.

C. RÉSULTATS

Pendant l'année financière 1984-1985, nous avons reçu 3 984 demandes, ce qui amène le total, du début au 31 mars 1985, à 7 614. Cela représente une moyenne mensuelle de 332 demandes, moins qu'en 1983-1984, l'année pendant laquelle nous en avions reçues 403 par mois.

Le **tableau 1** présente les statistiques sur les activités du PDIR pour chaque palier, du 1er juillet 1983 au 31 mars 1985. Il est fondé sur les demandes reçues depuis le début et leur situation au 31 mars 1985. Dans le grand total, on compte 26 demandes reçues en vertu de la Loi sur les subventions au développement régional et acheminées au PDIR en vertu de l'article 13 de la Loi sur le développement industriel et régional.

Les **tableaux 3, 4, 5, 6 et 7** donnent des informations plus détaillées au sujet des offres acceptées, pour l'année en cours et depuis le début du programme. Les **tableaux 8, 9 et 10** fournissent des renseignements additionnels se rapportant exclusivement à l'année en cours. Vous trouverez ci-dessous une explication détaillée de chacun de ces tableaux.

1. Les demandes reçues

Nombre total de demandes à l'étude au 31 mars 1985	1 609
plus le nombre de demandes reçues en 1984-1985	3 984
égale le nombre de demandes à évaluer pour 1984-1985	5 593
moins le nombre d'évaluations terminées au 31 mars 1985	4 780
égale le nombre de demandes à l'étude au 31 mars 1985	813

Dans les 4 780 évaluations terminées, on compte 1 619 offres et 28 projets autorisés pour lesquels des offres seront faites au début de 1985-1986.

Le **tableau 2** donne le nombre de demandes reçues en 1984-1985, pour chaque palier. On voit que le palier II compte encore la plus grande proportion de demandes reçues (1 364), soit 34 % du total. Par contre, c'est dans le palier IV que l'on compte le plus grand nombre de demandes par habitant.

2. Les offres

Nombre d'offres faites au 31 mars 1984	549
plus le nombre total d'offres faites en 1984-1985	1 619
égale le total des offres faites au 31 mars 1985	2 168
moins les offres acceptées au 31 mars 1984	381
égale le nombre d'offres qui peuvent être acceptées en 1984-1985	1 787
moins : les offres déclinées/retirées au 31 mars 1985	88
les offres périmées au 31 mars 1985	57
les offres pas encore acceptées au 31 mars 1985	178
égale le total des offres acceptées en 1984-1985	1 464

Les **tableau 3** donne les offres acceptées pendant l'année financière en cours ainsi que le nombre cumulatif d'acceptations depuis le début du programme. Les 1 464 offres qui ont été acceptées en 1984-1985 ont utilisé 418 millions de dollars du PDIR. Le nombre total d'offres atteint donc 1 845, et les contributions, depuis le début du programme, se chiffrent à 501 millions de dollars. A noter que les 1 845 offres acceptées représentent 85 % des 2 168 offres faites depuis le début du programme.

Les **tableaux 3, 4, 6 et 7** donnent une ventilation des offres acceptées, par palier, élément de programme, ampleur de l'aide et selon la classification type des industries. Le **tableau 5** donne les offres acceptées d'une valeur supérieure à 5 millions de dollars, par élément de planification et palier. Le **tableau 10** présente une liste détaillée de chacune des 1 464 offres acceptées en 1984-1985.

On peut voir au **tableau 3** que la majeure partie des offres acceptées sont du palier II (458 ou 31 %); viennent ensuite, très près derrière, les offres du premier palier (419 ou 29 %), et celles du palier III (398 ou 27 %). Cependant, si l'on regarde la valeur de l'aide, c'est le premier palier qui l'emporte, avec près de 175 millions de dollars, soit 42 % du total; on trouve ensuite le palier II, avec 111 millions ou 27 %, le palier III avec 64 millions ou 17 % et enfin le palier IV, avec 14 % du total de l'aide versée dans le cadre du PDIR.

Comme le montre le **tableau 4**, l'élément de modernisation et d'agrandissement, qui compte 826 offres acceptées, représente environ 56 % de l'aide totale versée par le PDIR en 1984-1985.

L'élément d'innovation vient assez loin derrière avec 266 offres représentant seulement 18 % du total. Dans l'élément du contexte de développement industriel, 106 offres ont été acceptées (7 % du total); seulement 8 offres (soit 0,5 % du total) ont été acceptées dans l'élément de restructuration; cela traduit partiellement les changements aux exigences d'admissibilité qui ont fait suite aux modifications apportées au règlement le 9 novembre 1984.

Le **tableau 6** présente les offres acceptées, par fourchette de montants. On voit que 70 % des offres acceptées visaient des sommes publiques inférieures à 100 000 $. Toutefois, la valeur monétaire de ces offres ne représentent que 11 % de l'aide totale autorisée en vertu du PDIR en 1984-1985. Si l'on ne compte que 60 offres dont la valeur dépasse un million de dollars, elles représentent néanmoins plus de 62 % des sommes totales versées. Le **tableau 5** montre que les 14 offres acceptées d'une valeur supérieure à 5 millions de dollars constituent 36 % de l'aide totale. De ce nombre, cinq se trouvent dans le premier palier et comptent pour 20 % du total.

Le **tableau 7** donne le nombre d'offres acceptées ainsi que l'aide autorisée pour chaque catégorie de la classification type des industries. On voit que les secteurs des produits de fabrication métallique et des aliments, qui comptent chacun 11 % des offres acceptées, et celui de la machinerie, qui équivaut à 10 % du total des offres acceptées, ne représentent que 14 % de l'aide totale. Par contre, le secteur du matériel de transport, qui ne représente que 5 % des offres acceptées, a reçu 24 % de l'aide, soit la plus grosse part; on trouve immédiatement derrière le secteur des produits électriques et électroniques, qui a pris 20 % de l'aide totale, mais qui comptait seulement 10 % des offres acceptées. Dans le secteur du tourisme, 124 offres on été acceptées et ont absorbé 4 % de l'argent du PDIR versé en 1984-1985.

Il faut souligner que la catégorie des " autres ", qui a reçu 7 % de l'aide, est constituée principalement du secteur de l'enseignement, lequel a reçu 2 % du total du programme, pour 66 offres acceptées. Les 5 % qui restent ont été distribués parmi divers autres secteurs.

3. Les avantages

L'un des critères généraux du programme exige que le projet visé et l'exploitation des résultats obtenus doivent fournir des avantages économiques importants pour le Canada. Deux des principaux indicateurs économiques du programme sont le nombre d'emploi créés ou préservés grâce à l'aide autorisée et l'effet d'accroissement de l'investissement privé dans le projet appuyé.

Le **tableau 8** donne la ventilation, par élément de programme et palier, de l'effet d'accroissement de l'investissement privé. Cet indice est obtenu en divisant les coûts des projets par l'aide autorisée. On peut voir que le rapport le plus élevé (7/1) est dans l'élément de modernisation et d'agrandissement et dans le premier palier; suivent l'élément d'établissement et le palier IV avec un rapport de 6/1. Le rapport le plus bas est à l'élément de commercialisation (2/1).

C'est dire que, pour chaque dollar versé par le gouvernement fédéral, l'industrie privée a investi environ 7 $ dans des projets du premier palier et des secteurs liés à l'agrandissement et à la modernisation, comparativement à 2 $, pour les projets relatifs à la commercialisation. La moyenne de l'effet de l'investissement, pour tous les paliers et tous les éléments de planification, est de 6/1. En 1983-1984, ce rapport n'atteignait que 4,5/1; il y a donc eu une amélioration sensible, en 1984-1985.

Le **tableau 9** indique les emplois créés et préservés, pour chaque palier et les éléments d'innovation, d'établissement et de modernisation et agrandissement. On voit que le coût de création et de préservation d'un emploi, pour le programme en 1984-1985, varie de 24 672 $ à 6 688 $. Le coût moyen d'un emploi pour les trois éléments est évalué à 7 855 $. C'est dans le palier I spécial que l'emploi coûte le plus cher (24 672 $); à l'opposé, il ne faut que 6 688 $ pour créer ou préserver un poste dans l'élément de modernisation ou d'agrandissement.

On ne dispose d'aucune donnée relative aux emplois sur les éléments du contexte du développement industriel, de commercialisation et de restructuration; le seul indicateur valable des avantages, pour ces groupes, est l'effet d'accroissement de l'investissement privé, donné au **tableau 8**.

DÉFINITION DES TERMES

Dans la présente section, on cite les termes utilisés dans le rapport et on en donne une brève explication. Ces explications ont pour but de faciliter la compréhension; elles ne constituent pas nécessairement des définitions juridiques ou administratives complètes, pas plus qu'elles ne décrivent tous les avantages, conditions, restrictions ou exigences prévus par le programme. A des fins précises, il faut se reporter à la Loi sur le développement industriel et régional et au règlement y afférent, de même qu'à d'autres sources d'information officielles.

1. Contribution : une contribution non remboursable, partiellement remboursable, obligatoirement remboursable ou remboursable aux conditions mentionnées dans l'offre et acceptées par le requérant.

2. Prêt participatif : un prêt pour l'implantation d'un nouvel établissement ou pour la restructuration d'une entreprise commerciale dont les conditions permettent au ministre de participer au succès de l'entreprise du requérant, au moyen d'une option d'achat d'actions, de redevances sur les ventes ou la production, ou autrement; le taux d'intérêt relativement à un prêt participatif est égal au plus bas taux exigé par la Banque fédérale de développement à l'égard de ses prêts à terme.

3. Subvention : l'aide accordée à un requérant pour une bourse, une étude, ou l'élaboration d'un cours se rattachant au développement industriel.

4. Demande : une soumission écrite présentée par un requérant demandant de l'aide en vertu de la Loi sur le développement industriel et régional.

   a) Reçue : il s'agit d'une demande qui a été transmise au Ministère. La date de réception sert de point de repère pour déterminer l'existence d'engagements antérieurs à l'égard des coûts afférents à un projet ou à une activité proposés.

   b) Retirée : une demande révoquée par le requérant avant ou pendant l'évaluation.

   c) Rejetée : une demande relative à un projet jugé inadmissible en vertu de la Loi, lequel serait entrepris même sans l'attribution d'aide, ou qui n'apporterait pas de contribution économique ou sociale majeure au Canada.

   Une demande se rapporte généralement à un seul projet devant être réalisé à un seul endroit.

5. Offre faite : lorsqu'une demande a été étudiée et qu'une subvention ou une contribution a été autorisée, le requérant reçoit une lettre d'offre officielle qui lui fait part du montant estimatif et des conditions de la subvention ou de la contribution.

   a) Périmée : si le requérant n'accepte pas officiellement l'offre dans les quatre-vingt-dix jours, celle-ci devient périmée.

   b) Retirée : le Ministère peut retirer son offre si certains renseignements lui parvenant avant l'acceptation de l'offre l'autorisent à prendre cette mesure.

   c) Déclinée : un refus officiel d'une offre par le requérant.

6. a) Offre acceptée : une offre est acceptée lorsque le requérant en retourne une copie dûment signée dans les quatre-vingt-dix jours qui suivent la date de l'offre.

   b) Offre retirée (après l'acceptation) : le Ministère doit prendre les mesures nécessaires pour retirer son offre si des exigences légales n'ont pas été respectées, ou si le requérant revient sur sa décision après avoir accepté une offre.

7. Dernier versement effectué : le dernier versement au titre d'une contribution est effectué lorsque le Ministère a la certitude que toutes les conditions précisées dans l'offre acceptée ont été respectées. Le dernier versement en vertu d'un projet d'établissement, d'agrandissement ou de modernisation ne peut être fait avant vingt-quatre mois suivant la date certifiée de mise en exploitation commerciale. Pour tout autre projet, le dernier versement est effectué, une fois le projet terminé.

8. Emplacement du projet : le lieu du projet, selon les renseignements fournis par le requérant.

9. Code CAE : le système de classification des activités économiques de 1980 établi par Statistique Canada pour uniformiser les définitions et techniques de collecte et de compilation des statistiques ayant trait aux industries du Canada.

10. Éléments de programme :

   a) Contexte : des projets en vertu de l'élément contexte de développement industriel du PDIR pour l'établissement d'un centre ou d'un institut à but non lucratif se rattachant au développement industriel, ou pour une étude de développement économique, pour des services spécialisés, pour l'aménagement des infrastructures ou pour l'élaboration d'un cours, ou pour des bourses.

b) Innovation : des projets pour la mise au point d'un produit ou d'un procédé de production nouveau ou amélioré, pour la conception d'un nouveau produit durable qui puisse être fabriqué en série, pour l'amélioration ou l'expansion de la capacité technologique, ou pour la recherche et le développement dans le cadre de la technologie de lutte contre la pollution.

c) Nouvel établissement : il s'agit d'un nouvel établissement de fabrication de produits ou de prestation de services (tourisme).

d) Modernisation : il s'agit d'une modification ou d'un ajout à un établissement existant, qui a pour objet principal de diminuer les coûts de production et d'améliorer la qualité du produit, et qui peut aussi inclure le remplacement d'installations fixes, avec ou sans l'usage de dispositifs micro-électroniques.

e) Agrandissement : il s'agit d'un ajout apporté à un établissement existant afin d'y accroître la production d'une marchandise ou d'un service sur le même emplacement, ou du déménagement d'un établissement.

f) Commercialisation : des projets pour la collecte et la diffusion de renseignements, la préparation d'un événement spécial ou d'une conférence qui a pour objet de développer et d'étendre le marché touristique ou d'accroître la commercialisation des produits ou des services de ces entreprises; des projets pour la diffusion des documents, la publicité, les expositions commerciales, les colloques, les études et analyses de marché, et pour la promotion des normes et des spécifications de produits canadiens qui ont pour objet d'accroître la commercialisation des produits ou des services des entreprises commerciales.

g) Restructuration : un changement apporté aux produits, aux méthodes de production, aux services ou aux méthodes de commercialisation ou de gestion d'une entreprise commerciale qui a besoin de renouvellement.

11. Coût admissible prévu : il s'agit des coûts d'un projet de contexte de développement, d'innovation, d'établissement, d'agrandissement, de modernisation, de commercialisation, ou de restructuration, suivant l'évaluation qui en a été faite par le Ministère sur la foi des renseignements fournis par le requérant, et n'englobant que la partie admissible à une subvention, une contribution ou un prêt participatif.

12. Aide autorisée : il s'agit de l'estimation faite par le Ministère du montant de la subvention, de la contribution ou du prêt participatif qui sera versé, en fonction de l'évaluation du projet.
